In determining whether to release documents, Waccamaw Regional Council of Governments will detrimentally rely on Respondent's marking of documents, as required by these proposal instructions, as being either "Confidential" or "Trade Secret" or "PROTECTED". By submitting a response, Respondent agrees to defend, indemnify and hold harmless the Waccamaw Regional Council of Governments, its officers and employees, from every claim, demand, loss, expense, cost, damage or injury, including attorney's fees, arising out of or resulting from the State withholding information that Respondent marked as "confidential" or "trade secret" or "PROTECTED".

SECURITY

Due to the nature of the information managed by the State and/or Area Agency on Aging/Council of Government under this contract, any event resulting in a potential loss of confidentiality, integrity, and/or availability of sensitive data is unacceptable. - Integrity – guard against improper information modification or destruction and includes ensuring information nonrepudiation and authenticity. A loss of integrity is the unauthorized modification or destruction of information.

The contractor/provider must also provide:

- Documentation outlining the methodology used to defend against, identify and respond to, and mitigate risk of any breaches of sensitive data.
- Documentation of the process of notifying (AAA/COG) when a potential breach occurs, and the steps contractor/provider will take to resolve breaches and recover unauthorized release of information.

Security Assessment Questionnaire:

1. Describe your policies and procedures that ensure access to sensitive information is limited to only those of your employees and volunteers who require access to perform your proposed services.
2. What safeguards and practices do you have in place to vet your employees and volunteers who will have access to sensitive information?
3. Describe the policies, procedures, and practices you have in place to provide physical security of your papers with sensitive data, and access to sensitive areas in your organization.

Competition

This process is intended to promote competition. If the language, specifications, terms and conditions or any combination thereof restricts or limits the requirements in this RFP to a single source, it shall be the responsibility of the Respondent to notify Waccamaw Regional Council of Governments in writing so as to be received five (5) days prior to the opening date. The Request for Proposals may or may not be changed but a review of such notification will be made prior to the award.

Right to Protest

Right to protest: Any actual or prospective Respondent, offeror, or contractor who is aggrieved in connection with the solicitation or award of a contract may protest to the Executive Director of Waccamaw Regional Council of Governments. D. South Carolina Vehicle, Equipment & Temperature Requirements

1. General Requirements

All equipment and vehicles used in the preparation, transportation, service and delivery of food must have records of appropriate maintenance and meet the current requirements of the state and county health department. Equipment shall be classified or certified to listed NSF (National Sanitation Foundation)/American National Standards Institute (ANSI) Commercial Food Equipment Standards.

If necessary, vehicles must be equipped with adequate facilities, automatic in operation and thermostatically controlled, for maintaining food at safe temperature requirements.

The proposer shall provide support and necessary equipment for maintaining safe temperatures during the entire holding time for foods (until served or packed for delivery to the client). If delivered in bulk, food shall be packaged so that there will be a minimum of spills in the carrier. Measures may include monitoring fill level and covering pans with plastic film, aluminum foil and/or metal lids. Foods for

group dining and home-delivered meals may be packed together when it benefits compliance with food safety temperature requirements (i.e. less than 30 servings when using insulated carrier equipment). Thermal containers, etc. shall be provided in a size and/or quantity to contain all food delivered to the sites. Special care shall be taken in packaging cold food to prevent melting ice from contacting food.

The current required minimum holding temperature for heated food is 135 degrees °F and 41 degrees °F for cold foods. After removal from electric or gas-powered temperature control, foods shall be held at proper temperatures for no more than four hours before serving.

Daily records of the time and temperature of all potentially hazardous foods shall be maintained and provided upon request. Recorded information includes the time and temperature when the food was removed from temperature control (i.e. when foods were removed from a heating or cooling source). Temperature information shall be reported to each meal site on a daily basis. These records shall be kept for a period of three years.

The proposer shall provide at least one, properly calibrated dial or digital style thermometer to each site as well as provide instructions on re-calibrating the thermometers to ensure the accuracy of each.

Frozen meals must be stored as zero degrees °F. During transportation and delivery, the meals must remain solid to the touch. The proposer shall take any measure necessary to provide equipment and vehicles to ensure they remain in this state. If frozen meals are delivered with fresh or canned supplemental foods, these should be handled appropriately.

Equipment needed at dining sites to properly handle and prepare these meals may include chest freezers, prethermalization ovens/convection ovens, holding cabinets and refrigerated units. Maintenance of this equipment, when provided by the proposer, shall be the responsibility of the proposer, but daily cleaning of the equipment shall be the responsibility of the meal site personnel.

3. Beverage Equipment Requirements

Insulated beverage dispensers are to be used to keep beverages hot or cold. The capacity of the beverage holding equipment will be dependent upon the number of meals served at the site. Refer to [Beverage Service with Meals](#).

4. Supply/Equipment Responsibilities

As appropriate, daily meal delivery to include the provision of cleaned and sanitized serving utensils. Authorized designees are responsible for rinsing/removing food debris from equipment (utensils and serving pans, etc.); wiping any spills from thermal delivery containers; placing the rinsed and dry equipment into the delivery units and having it ready for pick up at the next delivery.

The proposer should have a method to ensure a working food thermometer is available for all days of service. Authorized designees are responsible for monitoring the operation of the supplied food thermometer and making timely requests for replacement when required.

Authorized designees are responsible for taking inventory and requisitioning paper supplies and edible items in a timely manner to ensure a perpetual inventory. Both parties shall rotate inventory of any edible supplies to ensure freshness.

E. South Carolina Nutrition Services Requirements

1. Nutrient Requirements

Each Nutrition Program meal must comply with the Dietary Guidelines for Americans (DGA's)- 2020-2025 and provide to each participating individual: A minimum of 33 1/3 percent of the Dietary Reference Intakes (DRI's) per meal, if the project provides one meal per day. A minimum of 66 2/3 percent of the DRIs if the project provides two meals per day, and 100% of the DRIs if the project provides three meals per day.

2. Methods of Menu Compliance

Proposers must demonstrate compliance with the DGA's and DRI's by using **one** of the following documentation methods by meal type:

a. *Computer Analysis* - South Carolina Menu Guide Checklist [[Attachment H](#)]

Use of computer nutrient analysis software allows for increased menu planning flexibility. If the nutrient analysis method is used for menu compliance, it will supersede the meal pattern.

or

b. *Meal Pattern* - South Carolina Menu Guide Checklist [[Attachment I](#)]

This method is typically employed when there is no access to nutrient analysis software, but may also be selected for other reasons, such as ease of use when making substitutions.

Regardless of the method utilized, all standardized recipes and menus must be reviewed by a Registered Dietitian Nutritionist (include verification of Registration and Licensure status) to ensure compliance. The completion of the checklist and Registered Dietitian's final signature verifies that the corresponding signed menu is in compliance with the guidelines as set forth within this document.

3. Food Specifications

All food used in the preparation or service of meals shall be of high quality and meet any required standards and guidelines of the SCDHEC and the USDA. Food shall be from sources approved or considered satisfactory by the SCDHEC and USDA; shall be properly labeled; shall be free from spoilage, adulteration, and other contamination; and shall be safe for human consumption. No home-prepared or home-canned food is allowed.

The following minimum food standards must be met:

- Canned Fruits and Vegetables – USDA Grade A

- Fresh Fruits and Vegetables – #1 Quality
- Poultry – USDA Grade A or better
- Beef – USDA Choice or better; lean cuts should be selected and cooking methods that promote tenderness used
- Pork – USDA #1 or better; lean cuts should be selected and cooking methods that promote tenderness used
- Ground Meats (beef, pork and poultry) shall not exceed 20 percent fat by weight
- Fish – all fish and seafood products shall be of comparable quality to USDA guidelines for beef and poultry.
- Eggs (or pasteurized eggs) – USDA Grade A or better
- Milk and milk products (fluid or dry) – pasteurized and USDA Grade A
- Salt – Iodized

4. Recipes & Menu Planning

All bidders, regardless of menu compliance method utilized, should refer to the Dietary Guidelines for Americans 2020-20205. See [\[Attachment J\]](#).

Tested quantity recipes, adjusted to yield the number of servings needed, must be used to achieve consistent and desirable quality and quantity. Only actual recipe ingredients, that have been accurately identified, should be used in the menu approval process.

Successful bidders shall maintain a recipe file at each production site and provide copies of these recipes upon request. If the proposer provides meals from more than one production site, all production sites must use the same products and follow the same standardized recipes.

Foods must be selected, stored, and prepared to assure maximum nutritional content. Specific attention should be given to batch cooking and short cooking times, minimizing the use of water in the preparation of vegetables and minimal holding times for foods. No deep fat frying of foods is permitted.

When delivered, the food shall be appetizing, attractive in color and texture, lightly seasoned and not greasy. Whenever possible, herbs and spices appropriate to the dish should be utilized to reduce the amount of sodium added in food preparation. Fats should be primarily from vegetable sources and in a liquid or soft (spreadable) form (polyunsaturated and monounsaturated fats) that are lower in partially hydrogenated fat (trans-fatty acids), saturated fat and cholesterol.

Food items within the meat, vegetable, fruit, and dessert groups shall be varied within the week and not repeated on the same days of consecutive weeks. A variety of food attributes and combinations shall be considered in menu planning. Religious, ethnic, cultural or regional dietary requirements or preferences shall be reflected in the planned menus. Cycle menus should include the provision of seasonal foods.

5. Beverage Service with Meals

Dehydration is a common problem in older adults. Therefore, at a minimum, drinking water should be available with all meals.

- Milk is not a required beverage as long as calcium requirements are met.
- Other beverages, such as 100% fruit juices, may be served occasionally, as long as nutrient/meal pattern targets are met. Low nutritive value beverages that provide excess calories, such as fruit flavored beverages and sweetened drink mixes, should be avoided.
- Non-nutritive beverages (i.e. sugar-free drinks) do not help meet nutritional requirements but can help with hydration.

Optional Beverage Service: One optional beverage may be requested. The beverage option can be switched according to seasonal preference. The size of the urns and dispensers provided to each site shall be large enough to accommodate the number of group dining meals ordered for the site.

The following items, as appropriate, would be provided and included in the cost if optional beverage service is desired:

- Hot Beverage: urns, sugar, sugar substitute, creamer, six or eight ounce cups for hot liquids, and stirrers;
- Cold Beverage: dispenser, ice, unsweetened tea, sugar, sugar substitute, stirrers, and nine or ten ounce cups for iced tea.

Minimum Meal Specifications Required Information Checklist

Proposers shall thoroughly examine all aspects of this Request for Proposals. All of the supplemental materials identified and requested in this section must be submitted and made a part of the Proposal.

The Compliance Value Average is to allow for menu flexibility and client satisfaction. Please note that some nutrients such as calories and protein should meet Target Values daily. No individual meal should be less than 600 calories.

To increase menu variety, slight increases in the one-third (1/3) DRI minimums for fat and sodium may occur twice per menu cycle: sodium must not exceed 1400 milligrams and fat shall not exceed 35%.

ATTACHMENT I: SOUTH CAROLINA MENU CHECKLIST Meal Pattern

If nutrient software is not used, each meal will follow the meal pattern described in this section.

Instructions: A food item in one or more food group can only be classified once as meeting the requirement for a meal. For example: cottage cheese can be counted as a Milk/Milk alternative *or* a Lean Protein source, not both.

Nutrient-rich desserts that include fruit, whole grains, and low-fat milk can count toward meeting the appropriate food group required servings.

ATTACHMENT J - Dietary Guidelines for Americans 2020-2025

The Dietary Guidelines translates the nutrient quantitative requirements or limits – known as Dietary Reference Intakes (DRI) – into food and beverage recommendations. The information within this section provides the framework for healthy menu planning practices for the older adult nutrition program. Using nutrient analysis method for menu compliance supersedes the meal pattern method.

Grains

Grains are divided into two subgroups, whole grain and refined grains.

- **Whole grains** contain the entire grain kernel – the bran, germ and endosperm.
 - Provide a higher fiber and potassium content
- **Refined grains** have been milled, a process that removes the bran and germ.
 - **Enriched grains**- B vitamins (thiamin, riboflavin, niacin, folic acid) and iron are added back in after processing. Fiber is not added back in.

Grain serving sizes:

1 slice (1 oz) of bread	3/4 cup (1 oz) of ready-to-eat-cereal
½ cup cooked rice	½ cup cooked cereal (grits, oatmeal)

Meats and poultry should be lean or low-fat.</p> <hr/> <p>Processed meats (high in sodium and saturated fat) may be served a maximum of 1 x's weekly:</p> <ul style="list-style-type: none"> Bologna Canned, pressed luncheon meat Corndogs Hot dogs Pepperoni Polish Sausage 	<p>Common seafood include sea bass, catfish, cod, flounder, haddock, hake, pollock, salmon, sardine, sole, tilapia, light tuna, and whiting.</p>	<p>Nuts and seeds include all nuts (tree nuts and peanuts), nut butters, seeds (e.g., chia, flax, pumpkin, sesame, and sunflower), and seed butters (e.g., sesame or tahini and sunflower). Soy includes tofu, tempeh, and products made from soy flour, soy protein isolate, and soy concentrate. Nuts should be unsalted.</p>

Sodium

The Dietary Guidelines recommends moderate sodium (e.g. salt) intake, and therefore the SCDOA Menu Policies have established target sodium content per meal, maximum values per menu cycle as well as weekly averages. To assist in determining if food products meet the sodium limits, please refer to chart below, and review the Protein Foods section. Foods should be flavored with herbs and spices instead of salt.

Food and Drug Administration Regulations for Low Sodium Labeling Terminology

Terms	Sodium Amount
"Sodium Free"	Less than 5 milligrams per serving
"Very low sodium"	35 milligrams or less per serving
"Low sodium"	140 milligrams or less per serving
"Reduced Sodium"	Usual sodium level is reduced by 25%
"Unsalted, no-salt-added, or without added salt"	Made without the salt that is normally used, but contains the sodium that is a natural part of the food itself.

Oils

Oils are important to consider as part of a healthy dietary pattern as they provide essential fatty acids. Acceptable oil use for food preparation includes canola, corn, olive, peanut, safflower, soybean, and sunflower oils. Oils also are naturally present in nuts, seeds, seafood, olives, and avocados. Meals preparation should avoid the use of butter, shortening, lard, coconut oil, palm kernel oil, and palm oil (contain a higher percentage of saturated fat than do other oils).

1 serving is equivalent to:

1 Tablespoon vegetable oil or margarine	½ medium avocado
1 Tablespoon mayonnaise	1 oz (1/4 cup) nuts or seeds
2 Tablespoons low-sodium salad dressing	
2 Tablespoons peanut butter	

Condiments

Encourage herbal seasonings, lemon, and vinegar to provide flavor without sodium. Limit foods high in sodium. Condiments include items on the side like salad dressing, ketchup, mustard, relish packets, etc. If part of the planned meal, these items should be included in the meal pattern or nutrient analysis.

Desserts

Recommend fruit for dessert to decrease added sugar consumption. Nutrient-rich desserts that contain fruit, whole grains, and low-fat milk products are encouraged.
